

Asynchronous

- ↳ independently code
- ↳ multiple functionalities

How to make it async:

1. callback
2. promises
3. Async await

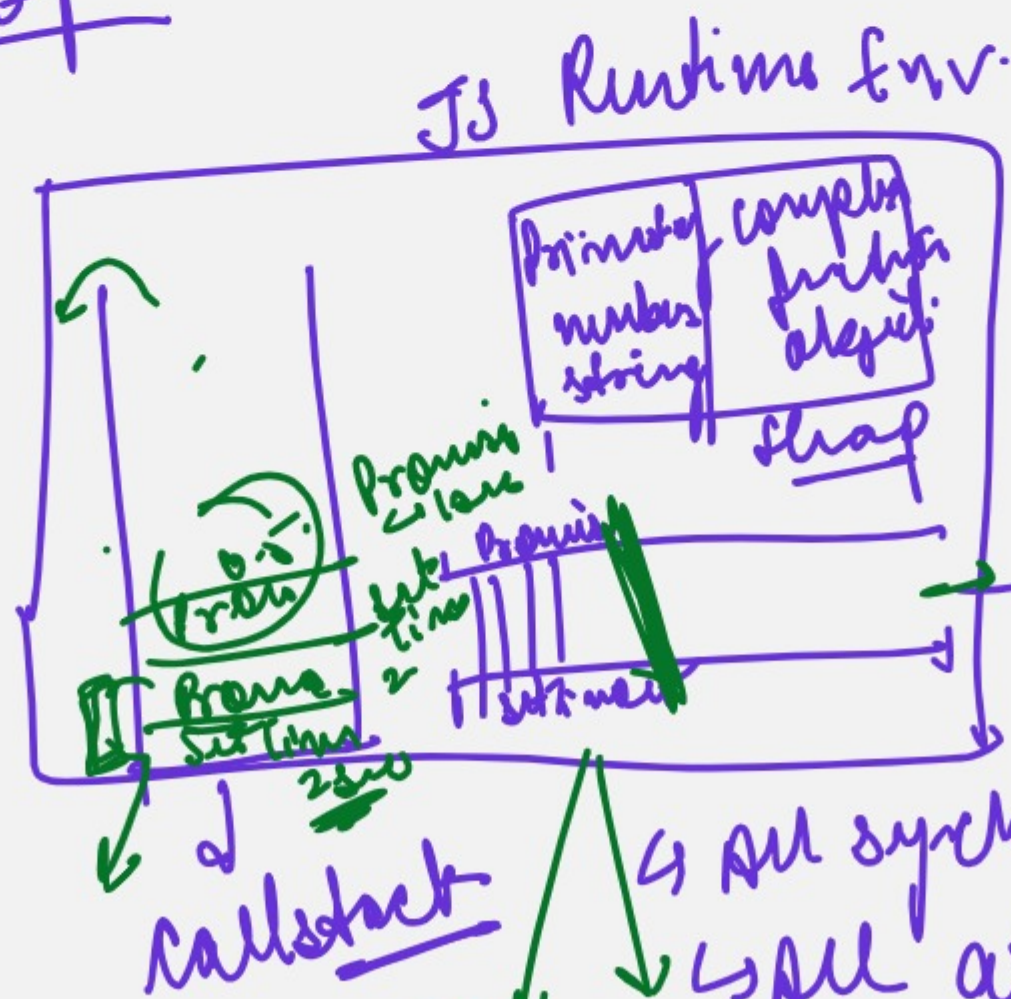

Promises

JS object
state
↳ pending → producing code is executed
↳ reject
↳ successful

Event loop

JS
console.log
Promise
console.log
setInterval
console.log

Synchr
↳ one by one

V8 Engine.
spider monkey.

Callback queue

Event loop

Micro
↳ promise
Macro
↳ event, setTimeout, setInterval
